

Basic multicast forwarder
(*olsr0.5.3-bmf-v1.6.2*)
Forwarding protocol that floods multicast traffic over an OLSR network

NACK oriented reliable multicast
(*norm ver 1.4b2*)
Transport-layer service that provides controlled latency reliability services for multiple traffic types

Optimized link-state routing
(*olsrd ver 0.5.3*)
Routing protocol that identifies multicast forwarders

802.11 Broadcast
(*BAE systems*)
Implementation of 802.11 broadcast mode used for both systems
